-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1- are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4, 7 and 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Priest et al. (Pat. No. 5,813,601).
5. Priest et al. disclose a mold with cooling channels wherein the temperature control medium is cycled exclusively by opening and closing of valve 1 which is located following the mold tool 5.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1732

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 3, 5, 6, 8 and 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Priest et al. (Pat. No. 5,813,601) taken together with Muller (DE-U 88 04 394 or US Pat No. 5,055,025).

8. Priest et al. disclose a mold with cooling channels wherein the temperature control medium is cycled exclusively by opening and closing of valve 1 which is located following the mold tool 5. Muller teaches the use of valves in cycling the flow in each line of the mold tool. It would have been obvious to provide a valve with temperature monitoring in multiple cooling channels of Priest et al. in view of the teaching of Muller since this will improve the molding of the parts. The providing of a pressure reduction valve in the supply line would have been an obvious safety feature after the pump 7 in Priest so as to avoid over pressurizing the supply line.
